

MYSIDELINE

RELEASE NOTES 5.22.1

What's new, MySideline?

- Highlight of this release is the brand new 'Game Day Admin' role in MySideline Manager!
- The new user management role type for a 'Game Day Admin' access allows assigned admins to oversee and manage multiple matches within the Association - MySideline Manager.
- Clearance enhancements include the ability to open a clearance from a member profile, updated wording on clearance request page for a participant to sight their email address and additional filters added to the / clearance - permits table to be able to filter Age ranges.
- MySideline Association & above Admin will no longer be able to create new venues to avoid further duplication. Need a new venue? [Get in touch!](#)

What did we fix / enhance?

- The player points column bug in the printed team sheets was showing as 0 for each player despite players have points allocated to them. This has been resolved in MySideline Association Admin.
- My Members filter now includes 'Ascending' and 'Descending' which allows administrators to adjust the table display in relevance of registration date - MySideline Admin.
- Interchange save bug solved - MySideline Association Admin.
- Injury Report error messaging enhancements to help guide users to finalise the missing fields (UX designers assisting with best approach) - MySideline Manager.
- Requirement to have programs disbursement report available at Program Region level - MySideline Game Dev Region Admin.
