MYSIDELINE

RELEASE NOTES 6.22.1

01/08/2022

What's new, MySideline?

Did you know MySideline has a Program Management tool? It's true! And we're currently working on enhancing the functionality so more people can use it, for more programs!

In this release we included the ability for Program Admins to:

- auto-generate a Program Registration URL from the program details page.
- search for programs using these tools:
  - type search program names.
  - filter by date range and program status.
  - 'Show All Programs' button.
- view 'In Progress' programs on the Programs table as the default.
- select 'Cancelled - Other' as a program status to cater for unprecendented events.
- report on all Program Admin and Game Dev Region Admin users via Reports.

Are you interested in running your Program Registration via MySideline? Get in touch with our friendly support team today!

What did we fix / enhance?

- Registration Detail Report was temporarily not displaying data sets between 01/07/2022-06/07/2022. This has now been solved!
- We've added season filters to assist with reporting:
  - Expression of Interest Report
  - Disbursement Report
  - Tribunal report
  - Duplicate resolution report
- Region Program Admin can now return to managing their own users with 'User Management' back up and running.
- Automatic email notification for a 'New User' has had a wording update to make it nice and clear for our new Administrators what role access they have.
- Ladder settings now allows you to sort by ladder points percentage calculation.
- MySideline Manager further look & feel updates for mobile.
